LAB COEDPA

Communicate - Educate - Participate

Who are we?

Social Laboratory COEDPA

- Experimental space to propose new initiatives.
- It is part of INDESS in the University of Cádiz.
- It thrives to increase awareness in:
 - Resilience: Risk awareness and prevention.
 - Sustainability: Environmental education to achieve SDGs.

Our objective

objective of the Social The Laboratory is to promote citizen science and the culture of risk prevention and management in order to build more resilient and sustainable societies through training in the fields of **formal and non-formal** education, research, innovation, technological development and scientific dissemination.

Our Lines of Research:

Blue Line

Its focus is on coastal and ocean management, reduction of coastal risk and education of coastal and marine ecosystems: **Safer, sustainable and inclusive blue tourism model**

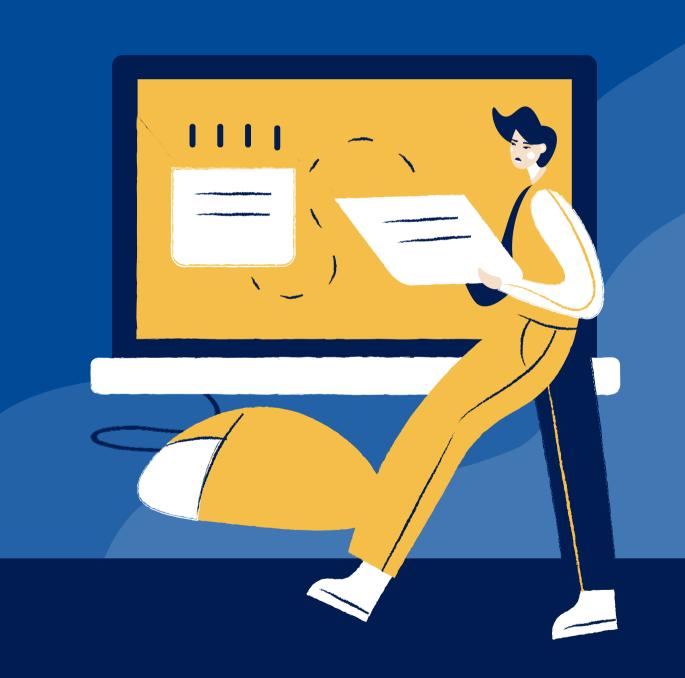

Green Line

It thrives to promote sustainable practices, especially inside urban areas for the reduction of pollution and to increase human well-being:

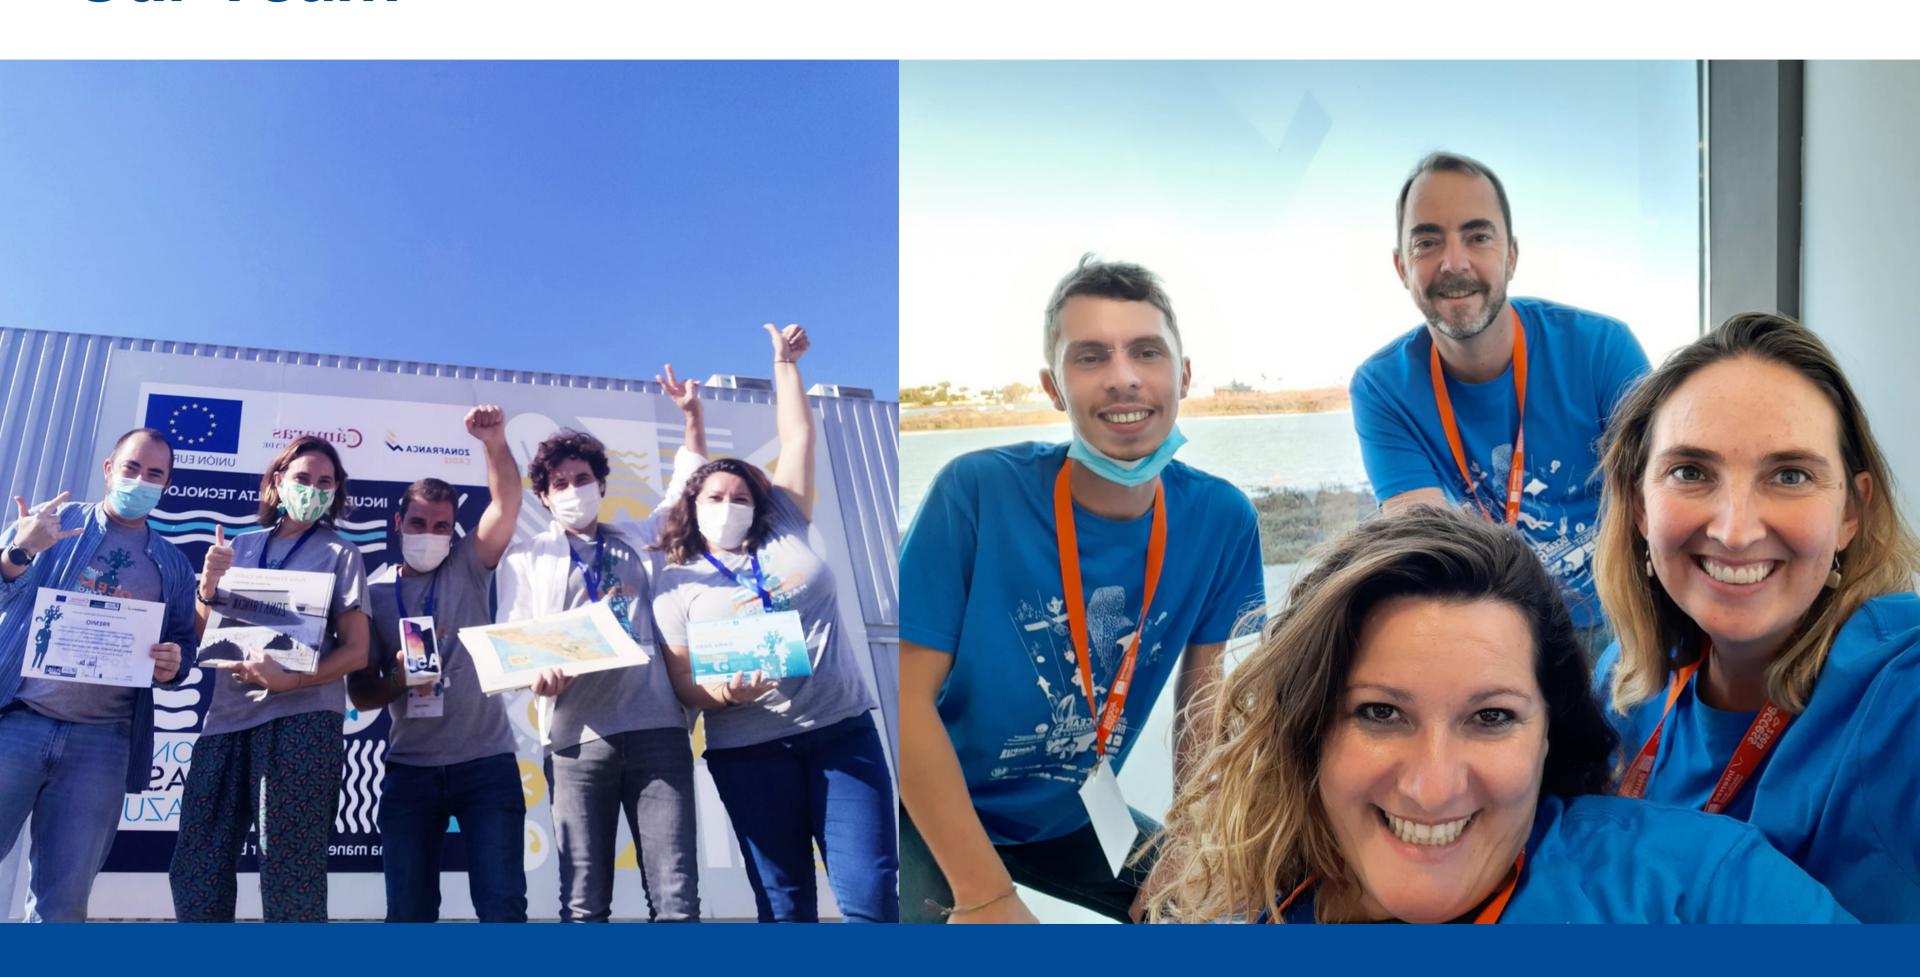

Sustainable cities model

We are polyglots!!
